

ECOearth[®] Recycled Rubber Flooring

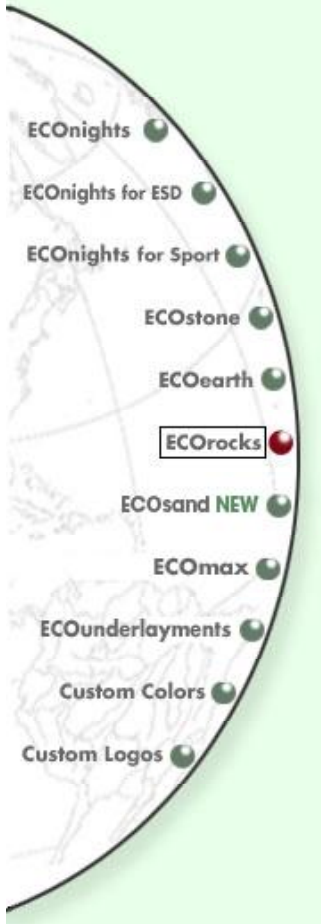

Easy to install and maintain, ECOearth rubber flooring offers 15 rich, organic colors inspired by the natural world and manufactured in a way that protects it.

ECOearth rubber flooring supports the ASTM Sustainability Assessment, enabling designers and specifiers to celebrate the green properties and sustainability of all the ECOsurfaces rubber flooring products, raw materials and manufacturing processes.

From the soft greens of a prairie meadow to the deep blues of a mountain lake, ECOearth rolls and tiles give new meaning to green floors.

ECOsand™ Recycled Rubber Flooring

Serve up a splash of color with ECOsand, the latest collection from ECOSurfaces. It's sensibly designed in twelve brilliant hues to not only compliment new and upcoming trends in commercial interiors but also [ECOearth](#), [ECOrocks](#) and [ECOstone](#).

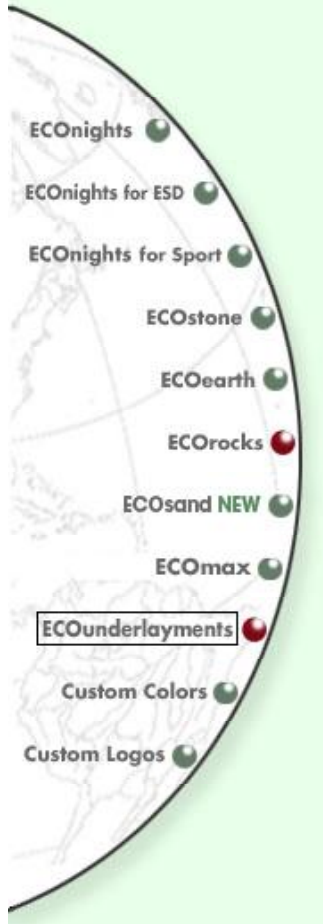

It's the harmonious blend of color that elevates ECOsand to a new level of refinement and cutting-edge style. Never before has recycled rubber flooring been designed specifically to coordinate with other interior finishes, from wood, carpet and tile to wall coverings, window treatments and furniture. ECOsand offers the shades and inspiration to create unique, impressionable interior spaces.

Crafted from refined EPDM colored rubber granules, ECOsand provides excellent indoor air quality and is 100% recyclable. And like all ECOSurfaces flooring, ECOsand is designed to meet stringent criteria required to earn points under the LEED rating system.

ECOunderlayments® Recycled Rubber Floor Underlayment

Offering high-performance, easy installation and low VOCs, ECOunderlayments recycled rubber floor underlayment systems are the solution when you want to keep things comfy, bouncy or quiet.

The ECOsilence recycled rubber floor underlayment is used directly underneath a number of floor coverings including ECOSurfaces rubber flooring to reduce sound transmission and vibration through floors. Available in continuous length rolls, ECOsilence meets building code standards for impact sound isolation with our without a suspended ceiling.

The ECOcomfort floor underlayment system consists of E-Grip II adhesive, 1/2" or 1" ECOcomfort and ECOSurfaces recycled rubber flooring or other flooring systems. Available in rolls, ECOcomfort reduces fatigue and injuries while providing plenty of support in retail checkout or hotel reception areas.
