

The header banner features the Bonded Logic logo on the left, a large image of blue jean insulation in the center, and a dark navigation menu on the right. The menu includes links for THE PROCESS, BENEFITS, CONTACT US, SITE MAP, and DISTRIBUTOR LOGIN. Below the banner is a 'PLAY INTRO' button. A section titled 'Top 100 Products of 2006:' highlights 'UltraTouch' as one of the top 100 products of 2006 by Architectural Products, accompanied by a small logo for Architectural Products. At the bottom of the banner is a horizontal navigation bar with links for UltraTouch, Insulator, LEED, OEM Applications, Distributors, Trade Shows, Company, and Home.

:: WELCOME to Bonded Logic, Inc.

We manufacture innovative natural fiber insulation products that are safe for you and the environment you live in. Utilizing almost exclusively natural fibers, Bonded Logic combines over 25 years of experience with a patented manufacturing process to create a superior performing insulation.

Building Green

When Building Green TV's host and executive producer Kevin Contreras built his green dream home in Santa Barbara, California, Bonded Logic's blue jean insulation was a natural fit. After extensive research, Kevin decided that straw bale construction with blue jean insulation made the most sense. He got so excited about what he learned, he visited the Bonded Logic factory in Chandler. It's all now part of the Building Green story, airing on PBS affiliate stations nationwide. "Insulating your attic with an eco-responsible product like Bonded Logic's blue jean insulation is one of the simplest, easiest things you can do to increase your comfort in your home and save energy," says Contreras. See for yourself when Building Green begins airing in the Phoenix area starting July 7. Can't wait? Visit Building Green TV on YouTube and see Bonded Logic in the "sizzle" reel introducing the new show.

Bonded Logic Inc is proud to announce the introduction of R30 batts to its UltraTouch product line. Please check with your local distributor for pricing and availability.

We're More Than Just UltraTouch...

Bonded Logic serves the OEM marketplace with a wide variety of fire retardent (FR) cotton shoddy products. Our process has the capability to produce both cotton shoddy and cotton-synthetic blend rolls or sheets. We currently supply a wide variety of industries including automotive, appliance, acoustic and HVAC.

For more information on OEM applications, please contact jerryw@bondedlogic.com

UltraTouch Featured in Newsweek!

UltraTouch was recently featured in a Newsweek article focused on the rapid growth of green building in America. Adrian Grenier, star of HBO's Entourage, recently installed UltraTouch in his Brooklyn, NY home. Green Depot provided "Vince" with his UltraTouch recycled denim insulation as well as other great products. Click on the link below for the full story!!
